ACCEL ENTERTAINMENT, INC.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Note 1. Description of Business

Accel Entertainment, Inc. (and together with its subsidiaries, the “Company” or “Accel”) is a leading distributed gaming operator in the United States (“U.S.”), as well as a developer of brick-and-mortar casinos that serve local gaming markets and horse racing venues. The Company has operations in Illinois, Montana, Nevada, Nebraska, Georgia, Iowa, Louisiana, South Dakota, West Virginia and Pennsylvania. The Company is subject to the various regulations in the states in which it operates, as well as various other federal, state and local laws and regulations.

The business primarily consists of the installation, maintenance, operation and servicing of gaming terminals and related equipment, redemption devices that disburse winnings and contain automated teller machine (“ATM”) functionality, and amusement devices in authorized non-casino locations such as bars, restaurants, convenience stores, truck stops, and fraternal and veteran establishments as well as casinos and horse racing venues. The Company also operates stand-alone ATMs in gaming and non-gaming locations and designs and manufactures gaming terminals and related equipment.

Note 2. Summary of Significant Accounting Policies

Basis of presentation and preparation: The condensed consolidated financial statements and accompanying notes were prepared in conformity with U.S. generally accepted accounting principles (“GAAP”) and the rules and regulations of the Securities and Exchange Commission (“SEC”). The condensed consolidated financial statements include the accounts of the Company and of its wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation. Certain prior period amounts have been reclassified to conform to the current period presentation. In the opinion of management, the condensed consolidated financial statements include all recurring adjustments and normal accruals necessary for a fair presentation of the Company’s financial position, results of operations and cash flows for the dates and periods presented. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and the related notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2025 (the “Form 10-K”). In preparing our condensed consolidated financial statements, we applied the same significant accounting policies as described in Note 2 to the consolidated financial statements in the Form 10-K. Any significant changes to those accounting policies are discussed below. Interim results are not necessarily indicative of results for a full year.

Use of estimates: The preparation of the condensed consolidated financial statements requires management to make estimates and assumptions that affect (i) the reported amounts of assets and liabilities, (ii) disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and (iii) the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Estimates used by the Company include, among other things, the useful lives for depreciable and amortizable assets, income tax provisions, the evaluation of the future realization of deferred tax assets, projected cash flows in assessing the initial valuation of intangible assets in conjunction with business and asset acquisitions, the selection of useful lives for depreciable and amortizable assets in conjunction with business and asset acquisitions, the valuation of level 3 investments, the valuation of contingent earnout shares, the valuation of interest rate hedging instruments, contingencies, and the expected term of share-based compensation awards and stock price volatility when computing stock-based compensation expense. Actual results may differ from those estimates.

Accel Entertainment, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements — (Continued)

Equity method investments: In the normal course of business, the Company makes investments in companies that will allow it to expand the Company's core business and enter new markets. In certain instances, such investments with less than 100% ownership may be considered a variable interest entity ("VIE"). The Company's management assesses whether it has the power to direct activities that most significantly impact the economic performance of the entity and has an obligation to absorb losses or the right to receive benefits from the entity. The activities that the Company believes most significantly impact the economic performance of its VIEs include the unilateral ability to approve the annual budget, to terminate key management and to approve entering into agreements with providers, among others. If the Company determines it has an investment in a VIE, the next step is to determine whether the Company is the primary beneficiary of the VIE, which would require the Company to consolidate the investment. In assessing whether it has a controlling financial interest, the Company's management assesses, among other factors, the Company's risk of loss, its investment percentage and its ability to control the operations of the investment. If the Company determines it is not the primary beneficiary, it will account for the investment under the equity method of accounting.

The Company accounts for its investments in unconsolidated affiliates, which do not meet the controlling financial interest consolidation criteria of the authoritative accounting guidance for VIEs, under the equity method of accounting. Under the equity method of accounting, the Company records its share of net income or loss from equity method investments within (income) loss from unconsolidated affiliates in the condensed consolidated statements of operations and comprehensive income based on the most recently available financials after a lag of one quarter. The Company also adjusts the carrying value of its investments in unconsolidated affiliates based on its share of net income or loss from equity method investments.

In 2024, the Company invested \$5.0 million in HBC Gaming LLC ("HBC"), in exchange for a 5% equity interest. HBC is a local entertainment company based in Hampton, New Hampshire that specializes in providing a variety of gaming services to its customers. The Company assessed its investment and determined it is an investment in a VIE but determined it is not the primary beneficiary and does not consolidate HBC. The Company's maximum risk of loss is equal to its initial \$5.0 million investment. As such, the Company's 5% investment in HBC qualifies for equity method accounting. The Company recorded its initial investment of \$5.0 million within other assets on the condensed consolidated balance sheets. The Company also has obligations to fund additional equity investments in the event certain construction and development milestones are met in an amount up to 10% ownership of HBC, on an undiluted basis, at an additional cost of up to \$6.5 million.

The Company recorded a loss from unconsolidated affiliates of less than \$0.1 million for both the three and six months ended June 30, 2026 and 2025.

Revenue recognition: The Company primarily generates revenues from the following types of services: gaming terminals, amusements, and ATMs. The Company also generates manufacturing revenue from the sale of gaming terminals and associated software, as well as revenue from its casino and racing operations. Revenue is disaggregated by type of revenue and is presented on the face of the condensed consolidated statements of operations and comprehensive income.

Recent accounting pronouncements: In May 2025, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2025-03, *Business Combinations (Topic 805) and Consolidation (Topic 810): Determining the Accounting Acquirer in the Acquisition of a Variable Interest Entity*, which provides enhanced comparability of financial statements across entities engaging in acquisition transactions effected primarily by exchanging equity interests when the legal acquiree meets the definition of a business. The ASU is effective for fiscal years beginning after December 15, 2026, and interim periods within those annual reporting periods. Entities must adopt the changes prospectively to any acquisition transaction that occurs after the initial application date. The Company is currently evaluating the potential effect that this ASU will have on its financial statement disclosures.

In September 2025, the FASB issued ASU 2025-06, *Intangibles—Goodwill and Other—Internal-Use Software (Subtopic 350-40): Targeted Improvements to the Accounting for Internal-Use Software*, which provides enhanced language to remove all references to prescriptive and sequential software development stages (referred to as “project stages”) throughout Subtopic 350-40. Therefore, an entity is required to start capitalizing software costs when both of the following occur, 1) management has authorized and committed to funding the software project and 2) it is probable that the project will be completed and the software will be used to perform the function intended. The ASU is effective for fiscal years beginning after December 15, 2027, and interim periods within those annual reporting periods. Entities must adopt the changes either 1) prospectively, 2) retrospectively to any or all prior periods presented in the financial statements, or 3) using a modified transition approach that is based on the status of the project and whether software costs were capitalized before the date of adoption after the initial application date. The Company is currently evaluating the potential effect that this ASU will have on its financial statements and disclosures.

In September 2025, the FASB issued ASU 2025-07, *Derivatives and Hedging (Topic 815) and Revenue from Contracts with Customers (Topic 606)*, which provides enhanced language concerning the definition of a derivative and how it should not apply to certain contracts. Therefore, the amendments in this update expand the scope exception for certain contracts not traded on an exchange to include contracts for which settlement is based on operations or activities specific to one of the parties to the contract. This improvement is expected to result in more contracts and embedded features being excluded from the scope of Topic 815. The ASU is effective for fiscal years beginning after December 15, 2026, and interim periods within those annual reporting periods. Entities must adopt the changes either 1) prospectively, 2) modified retrospectively through a cumulative-effect adjustment to the opening balance of retained earnings as of the beginning of the annual reporting period of adoption for contracts existing as of the beginning of the annual reporting period of adoption. The Company is currently evaluating the potential effect that this ASU will have on its financial statements and disclosures.

Notes to Condensed Consolidated Financial Statements — (Continued)

In November 2025, the FASB issued ASU 2025-09, *Derivatives and Hedging (Topic 815) Hedge Accounting Improvements*, which provides clarification on certain aspects of the guidance on hedge accounting and to address several incremental hedge accounting issues arising from the global reference rate reform initiative such as risk assessment for cash flow hedges, forecasted interest payments, nonfinancial forecasted transactions and written options. The ASU is effective for fiscal years beginning after December 15, 2026, and interim periods within those annual reporting periods. Entities must adopt the changes on a prospective basis for all hedging relationships. An entity may elect to adopt the amendments in this Update for hedging relationships that exist as of the date of adoption. The Company is currently evaluating the potential effect that this ASU will have on its financial statements and disclosures.

In December 2025, the FASB issued ASU 2025-11, *Interim Reporting (Topic 270) Narrow-Scope Improvements*, which provides clarification on interim disclosure requirements and the applicability of Topic 270. This improvement is expected to result in a comprehensive list of interim disclosures that are required by GAAP. The objective of the amendments is to provide clarity about the current requirements, rather than evaluate whether to expand or reduce interim disclosure requirements. The ASU is effective for fiscal years beginning after December 15, 2027, and interim periods within those annual reporting periods. Entities must adopt the changes either 1) prospectively or, 2) retrospectively to any or all prior periods presented in the financial statements. The Company is currently evaluating the potential effect that this ASU will have on its financial statements and disclosures.

In November 2024, the FASB issued ASU 2024-03, *Income Statement - Reporting Comprehensive Income (Subtopic 220-40): Disaggregation of Income Statement Expenses*, which requires public entities to disclose information about certain costs and expenses. The amendments in this ASU improve financial reporting by requiring additional disclosure of information and specific expense categories in the notes to the financial statements at interim and annual periods. The ASU is effective for fiscal years beginning after December 15, 2026, and interim periods within annual reporting periods beginning after December 15, 2027. Entities must adopt the changes either 1) prospectively to financial statements issued for reporting periods after the effective date of this update or 2) retrospectively to any or all prior periods presented in the financial statements. The Company is currently evaluating the potential effect that this ASU will have on its financial statement disclosures.

Other recently issued accounting standards or pronouncements have been excluded because they are either not relevant to the Company, or are not expected to have, or did not have, a material effect on its condensed consolidated financial statements.

In comparison, depreciation and amortization of property and equipment was \$13.1 million and \$25.4 million for the three and six months ended June 30, 2025, respectively.

Note 6. Route and Customer Acquisition Costs

The Company enters into contracts with third parties and its gaming locations to install and operate gaming terminals. Payments are due when gaming operations commence and then on a periodic basis for a specified period of time thereafter. Gross payments due, based on the number of live locations, were approximately \$17.6 million and \$15.1 million as of June 30, 2026 and December 31, 2025, respectively. Payments are due over varying terms of the individual agreements and are discounted at the Company's incremental borrowing rate associated with its long-term debt at the time the contract is acquired. The net present value of payments due was \$14.6 million and \$12.7 million as of June 30, 2026 and December 31, 2025, respectively, of which approximately \$3.2 million and \$2.5 million was included in current liabilities in the accompanying condensed consolidated balance sheets as of June 30, 2026 and December 31, 2025, respectively. The route and customer acquisition cost asset was comprised of upfront payments made on the contracts of \$32.7 million and \$31.2 million as of June 30, 2026 and December 31, 2025, respectively. The Company has upfront payments of commissions paid to the third parties for the acquisition of the customer contracts that are subject to a clawback provision if the customer cancels the contract prior to completion. The payments subject to a clawback were \$2.7 million and \$5.0 million as of June 30, 2026 and December 31, 2025, respectively.

Route and customer acquisition costs consisted of the following as of June 30, 2026 and December 31, 2025 (in thousands):

Interest rate hedging instruments

The Company manages its exposure to interest rate risk through the use of interest rate hedging instruments, which are derivative financial instruments.

On January 12, 2022, the Company hedged the variability of the cash flows attributable to changes in the 1-month Secured Overnight Financing Rate (“SOFR”) interest rates on the first \$300 million of the term loan under the Company’s prior credit agreement by entering into a 4-year series of 48 deferred premium caplets (“caplets”), which expired in January 2026.

On January 30, 2026, following the expiration of the caplets and to continue to hedge the variability of the cash flows attributable to the changes in the 1-month Term SOFR interest rate, the Company entered into an interest rate collar. The collar, which is designated as a cash flow hedge, establishes a cap interest rate of 4.00% and a floor interest rate of 2.9215%. The interest-rate collar is structured so its notional amount and timing exactly match the term loan’s outstanding balance and scheduled principal payments. The interest rate collar matures in September 2029.

The Company recognized an unrealized gain, net of taxes, on the change in fair value of the interest rate hedging instruments of \$2.2 million both for the three and six months ended June 30, 2026. In comparison, the Company recognized an unrealized loss, net of taxes, of \$0.8 million and \$2.0 million for the three and six months ended June 30, 2025, respectively. For more information on how the Company determines the fair value of the interest rate hedging instruments, see Note 12.

The Company recognized interest income on the caplets of \$0.4 million for the six months ended June 30, 2026, as the caplets expired in January of 2026. In comparison, the Company recognized interest income on the caplets of \$1.8 million and \$3.6 million for the three and six months ended June 30, 2025, respectively. These amounts are reflected in interest expense, net in the condensed consolidated statements of operations and other comprehensive income.

As of June 30, 2026, there has been no realized gain or loss on the interest rate collar.

Note 10. Business and Asset Acquisitions2026 Business Acquisitions*Green Valley*

On June 1, 2026, the Company completed an acquisition with Midjit Market LLC, a Nevada based grocery chain, which is owned by Anabi Oil Corporation, and a terminal operator, Crawford Coin Machine Co. (collectively referred to as “Green Valley”). The acquisition was for a total purchase price of \$5.8 million, of which the Company paid \$5.5 million in cash at closing and the remaining \$0.3 million is due to the seller and is recorded within accounts payable as of June 30, 2026. The Company paid the remaining \$0.3 million in July 2026. The acquisition was accounted for as an asset acquisition in accordance with Topic 805. The purchase price was allocated to the following assets: i) gaming equipment totaling \$4.0 million, ii) ATM equipment totaling \$0.1 million, iii) gaming accessories totaling \$0.1 million, iv) vehicles totaling \$0.1 million, and v) location contracts totaling \$1.5 million. The results of operations for Green Valley are included in the condensed consolidated financial statements of the Company from the date of acquisition and were not material.

Rice Palace

On June 1, 2026, the Company acquired Rice Palace, a Louisiana based operator and licensed video poker truck stop, for a total purchase price of \$6.1 million, which included \$5.3 million paid in cash at closing with the remaining \$0.7 million recorded as consideration payable. The acquisition was accounted for as a business combination in accordance with Topic 805. The purchase price has been allocated to the tangible assets and identifiable intangible assets acquired and liabilities assumed based upon their estimated fair values as shown in the table below. The Company also assumed a lease for the land on which the acquired building is located. The excess of the purchase price over the tangible and intangible assets acquired and liabilities

On April 15, 2026, the Company completed an acquisition of certain assets of Admira LLC ("Admira"), an Illinois based terminal operator. The acquisition was for a total purchase price of \$2.8 million, paid in cash at closing. The acquisition was accounted for as an asset acquisition in accordance with Topic 805. The purchase price was allocated to the following assets: i) location contracts totaling \$2.3 million, and ii) gaming equipment totaling \$0.5 million. The results of operations for Admira are included in the condensed consolidated financial statements of the Company from the date of acquisition and were not material.

2025 Business Acquisitions*Dynasty*

On December 1, 2025, the Company acquired Dynasty Games ("Dynasty"), a Nevada based operator and owner of multiple licensed video poker establishments, for a total purchase price of \$4.3 million, which included i) \$4.0 million paid in cash at closing and ii) \$0.3 million deposited in escrow that is tied to a contingent liability with a present value of \$0.3 million on the date of acquisition. In April 2026, the Company paid \$0.1 million of the contingent liability using the funds deposited in escrow. The acquisition was accounted for as an asset acquisition in accordance with Topic 805. The purchase price was allocated to the following assets: i) gaming equipment totaling \$0.3 million, ii) vehicles totaling less than \$0.1 million, iii) inventory totaling less than \$0.1 million, iv) furniture & fixtures totaling less than \$0.1 million, v) location contracts totaling \$3.8 million, and vi) contingent liability totaling \$0.3 million. The results of operations for Dynasty are included in the condensed consolidated financial statements of the Company from the date of acquisition and were not material.

Consideration Payable

The Company has a contingent consideration payable related to certain locations, as defined in each respective acquisition agreement, which are placed into operation during a specified period after the acquisition date. The fair value of contingent

Note 11. Contingent Earnout Share Liability

Pursuant to the terms of the Company's Amended and Restated Certificate of Incorporation, the Company authorized and has available for issuance 10,000,000 shares of Class A-2 common stock. The holders of the Class A-2 common stock do not have voting rights and are not entitled to receive or participate in any dividends or distributions when and if declared from time to time.

In 2019, 5,000,000 shares of Class A-2 common stock were issued, subject to the conditions set forth in a restricted stock agreement (the "Restricted Stock Agreement"), which sets forth the terms upon which the Class A-2 common stock will be exchanged for an equal number of validly issued, fully paid and non-assessable Class A-1 common stock. The exchange of Class A-2 common stock for Class A-1 common stock will be subject to the terms and conditions set forth in the Restricted Stock Agreement, with such exchanges occurring in three separate tranches upon the satisfaction of the specified triggers, based on the closing sale price of Class A-1 common stock exceeding certain prices over certain trading periods.

In 2020, the market condition for the settlement of Tranche I was satisfied. As a result, 1,666,636 shares of the 1,666,666 shares of Tranche I Class A-2 common stock were converted into Class A-1 common stock.

The market conditions for the remaining two Tranches are as follows:

- Tranche II, equal to 1,666,667 shares of Class A-2 common stock, will be exchanged for Class A-1 common stock if the closing sale price of Class A-1 common stock on the New York Stock Exchange ("NYSE") equals or exceeds \$14.00 for at least twenty trading days in any consecutive thirty trading day period; and
- Tranche III, equal to 1,666,667 shares of Class A-2 common stock, will be exchanged for Class A-1 common stock if the closing sale price of Class A-1 common stock on the NYSE equals or exceeds \$16.00 for at least twenty trading days in any consecutive thirty trading day period.

Accel Entertainment, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements — (Continued)

The Company concluded that the Class A-2 common stock should be reflected as a contingent earnout share liability due to the fact that such shares are not entitled to dividends, voting rights, or a stake in the Company in the case of liquidation. The contingent earnout share liability is recorded at fair value. For more information on how the fair value is determined, see Note 12.

Note 12. Fair Value Measurements

ASC Topic 820, *Fair Value Measurements and Disclosures*, establishes a framework for measuring fair value and the corresponding disclosure requirements around fair value measurements. This topic applies to all financial instruments that are being measured and reported on a fair value basis.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, various methods, including market, income and cost approaches, are used. Based on these approaches, certain assumptions are utilized that the market participants would use in pricing the asset or liability, including assumptions about risk and/or the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable inputs. Valuation techniques are utilized that maximize the use of observable inputs and minimize the use of unobservable inputs. Based on the observability of the inputs used in the valuation techniques, it is required to provide information according to the fair value hierarchy. The fair value hierarchy ranks the quality and reliability of the information used to determine fair values. Assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

Level 1: Valuations for assets and liabilities traded in active exchange markets, such as the NYSE. Level 1 also includes U.S. Treasury and federal agency securities and federal agency mortgage-backed securities, which are traded by dealers or brokers in active markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2: Valuations for assets and liabilities traded in less active dealer or broker markets. Valuations are obtained from third-party pricing services for identical or similar assets or liabilities in active markets.

Level 3: Valuations for assets and liabilities that are derived from other valuation methodologies, including option pricing models, discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities.

The following tables summarize the Company's assets that are measured at fair value on a recurring basis (in thousands):

Interest rate hedging instruments

The Company determines the fair value of the interest rate hedging instruments using quotes that are based on models whose inputs are observable SOFR forward interest rate curves. The valuation of the interest rate hedging instruments is considered to be a Level 2 fair value measurement as the significant inputs are observable. Unrealized changes in the fair value of the interest rate hedging instruments are classified within other comprehensive income on the accompanying condensed consolidated statements of operations and comprehensive income. Realized gains on the interest rate hedging instruments are recorded to interest expense, net on the accompanying condensed consolidated statements of operations and comprehensive income and included within cash payments for interest, net on the condensed consolidated statements of cash flow.

Liabilities measured at fair value

The following tables summarize the Company's liabilities that are measured at fair value on a recurring basis (in thousands):

Contingent consideration

The Company uses a discounted cash flow analysis to determine the value of contingent consideration upon acquisition and updates this estimate on a recurring basis. The significant assumptions used in the Company's cash flow analysis includes the probability adjusted projected revenues after state taxes, a discount rate as applicable to each acquisition, and the estimated number of locations that “go live” with the Company during the contingent consideration period. The valuation of the Company's contingent consideration is considered to be a Level 3 fair value measurement as the significant inputs are unobservable and

require significant judgment or estimation. Changes in the fair value of contingent consideration liabilities are classified within other expenses, net on the accompanying condensed consolidated statements of operations and comprehensive income.

Contingent earnout shares

The Company determined the fair value of the contingent earnout shares based on the market price of the Company's Class A-1 common stock. The liability, by tranche, is then stated at present value based on i) an interest rate derived from the Company's borrowing rate and the applicable risk-free rate and ii) an estimate on when it expects the contingent earnout shares to convert to Class A-1 common stock. The valuation of the Company's contingent consideration is considered to be a Level 2 fair value measurement. Changes in the fair value of contingent earnout shares are included within loss on change in fair value of contingent earnout shares on the accompanying condensed consolidated statements of operations and comprehensive income.

There were no transfers in or out of Level 3 for the periods presented.

Note 13. Stockholders' Equity

Pursuant to the terms of the Company's Amended and Restated Certificate of Incorporation, the Company authorized and has available for issuance the following shares:

Class A-1 Common Stock

The holders of the Class A-1 common stock are entitled to one vote for each share. The holders of Class A-1 common stock are entitled to receive dividends or other distributions when and if declared from time to time and share equally on a per share basis in such dividends and distributions, subject to such rights of the holders of preferred stock.

Treasury Stock

On November 22, 2021, the Company's Board of Directors ("Board") approved a share repurchase program of up to \$200 million shares of Class A-1 common stock. On February 27, 2025, the Board approved an amendment to the share repurchase program to replenish the dollar amount that may be purchased under the program back to up to \$200 million shares of Class A-1 common stock (as amended, the "share repurchase program"). The timing and actual number of shares repurchased will depend on a variety of factors, including price, general business and market conditions, and alternative investment opportunities. Under the share repurchase program, repurchases can be made from time to time using a variety of methods, including open market purchases or privately negotiated transactions, in compliance with the rules of the SEC and other applicable legal requirements. The share repurchase program does not obligate the Company to acquire any particular amount of shares, and the share repurchase program may be suspended or discontinued at any time at the Company's discretion. As of June 30, 2026, the Company had acquired a total of 19.2 million shares under the share repurchase program at a total purchase price of \$201.1 million, of which 1.6 million shares at a total purchase price of \$17.7 million were acquired during the six months ended June 30, 2026.

Note 14. Segment Reporting

The Company assesses its reportable segments on an annual basis or as changes in its business occur. As part of its assessment, the Company has determined its chief operating decision maker ("CODM") to be its Chief Executive Officer, Andrew Rubenstein, who is ultimately responsible for the operating performance of the Company and the allocation of resources. The CODM assesses financial performance and allocates resources based on Adjusted EBITDA. Adjusted EBITDA is used by the CODM to understand the Company's underlying drivers of profitability, trends in its business, and to facilitate company-to-company and period-to-period comparisons. Segment asset information is provided to the CODM to support the CODM's assessment of performance but is not used to allocate resources.

Accel Entertainment, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements — (Continued)

The Company defines Adjusted EBITDA as net income plus:

- Amortization of intangible assets and route and customer acquisition costs
- Stock-based compensation expense
- Loss from unconsolidated affiliates
- Loss on change in fair value of contingent earnout shares
- Other expenses, net which consists of i) non-cash expenses including the remeasurement of contingent consideration liabilities, ii) non-recurring lobbying and legal expenses related to distributed gaming expansion in current or prospective markets, iii) other non-recurring expenses and beginning in 2026 iv) gain or loss on sale of fixed assets, which were previously presented in general and administrative expenses. Prior periods have not been recast to reflect this change.
- Depreciation and amortization of property and equipment
- Interest expense, net
- Emerging markets, which reflects the results, on an Adjusted EBITDA basis, for non-core jurisdictions where the Company's operations are developing
- Income tax expense

The Company's distributed gaming reportable segment consists of the installation, maintenance, and operation of gaming terminals, redemption devices that disburse winnings and contain ATM functionality and other amusement devices in authorized non-casino locations such as restaurants, bars, convenience stores, liquor stores, truck stops and grocery stores. The Company's operations and services are consistent in the Company's markets.

The Company has determined that with the acquisition of Fairmount in December 2024, it has two operating segments: distributed gaming and casino and racing as of June 30, 2026. However, the casino and racing operating segment does not meet the criteria of a reportable segment from a quantitative standpoint as of June 30, 2026. The Company will continue to evaluate from a quantitative and qualitative standpoint whether the casino and racing operating segment meets the criteria of a reportable segment.

Significant segment expenses, including disaggregated significant expenses that are presented within general and administrative expenses, are presented in the Company's condensed consolidated statement of operations and comprehensive income and are included in the table below.

The following table presents financial information with respect to the Company's single reportable segment, distributed gaming, for the three and six months ended June 30, 2026 and 2025. Additionally, the Company has included an "all other" operating segment which is its casino and racing operations that is neither individually reportable nor able to be aggregated or combined with another operating segment.

(3) Compensation related costs represent payroll and other related costs that are included in general and administrative on the condensed consolidated statements of operations and comprehensive income.

(4) All other segment items include other operating and general and administrative expenses (such as general and administrative expenses related to parts, advertising, information technology, etc.) which are included in general and administrative on the condensed consolidated statements of operations and comprehensive income and cost of manufacturing goods sold, as well as, adjustments for stock-based compensation expense and emerging markets.

(5) All corporate expenses were allocated to the distributed gaming reportable segment as of June 30, 2026 and 2025. The "all other" operating segment had total net revenues of \$13.3 million and \$24.0 million; cost of revenues of \$5.3 million and \$9.9 million; compensation related costs of \$4.0 million and \$7.2 million in operations and \$1.1 million and \$2.0 million in general and administrative; and all other segment items of \$2.3 million and \$4.3 million for the three and six months ended June 30, 2026, respectively. In comparison, the "all other" operating segment had total net revenues of \$9.5 million and \$15.4 million; cost of revenues of \$3.6 million and \$5.3 million; compensation related costs of \$3.5 million and \$5.2 million in operations and \$1.1 million and \$1.9 million in general and administrative; and all other segment items of \$1.9 million and \$3.3 million for the three and six months ended June 30, 2025, respectively.

(6) Loss on sale of fixed assets was \$2.5 million and \$3.2 million for the three and six months ended June 30, 2026, respectively, and is included in Other expenses, net. Loss on sale of fixed assets was \$0.1 million and \$0.3 million for the three and six months ended June 30, 2025, respectively, and is presented in general and administrative expenses, which is not an adjustment for EBITDA.

As of June 30, 2026, the assets associated with the distributed gaming segment are \$1.0 billion and the assets for the "all other" operating segment were \$65.1 million. See the condensed consolidated financial statements for other financial information (such as cash used for capital expenditures, etc.) regarding the Company's reportable segment.

Note 15. Stock-based Compensation

The Company grants various types of stock-based compensation awards. The Company measures its stock-based compensation expense based on the grant date fair value of the award and recognizes the expense over the requisite service period for the respective award.

Under the Accel Entertainment, Inc. Long Term Incentive Plan, the Company issued 164,794 restricted stock units (“RSUs”) to members of the Board during the first quarter of 2026, which will vest at the end of 2026. The estimated grant date fair value of these RSUs totaled \$1.8 million.

The Company issued 731,566 RSUs to certain eligible employees during the second quarter of 2026, which will vest over a period of less than 1 year to 3 years, as applicable. The estimated fair value of these RSUs totaled \$8.3 million.

Stock-based compensation expense, which pertains to the Company’s RSUs and performance-based restricted stock units, was \$3.2 million and \$5.7 million for the three and six months ended June 30, 2026, respectively. In comparison, stock-based compensation expense was \$2.8 million and \$4.9 million for the three and six months ended June 30, 2025, respectively. Stock-based compensation expense is included within general and administrative expenses in the condensed consolidated statements of operations and other comprehensive income.

Note 16. Income Taxes

The Company recognized income tax expense of \$5.9 million and \$11.2 million for the three and six months ended June 30, 2026, respectively. In comparison, the Company recognized income tax expense of \$5.1 million and \$10.1 million for the three and six months ended June 30, 2025, respectively.

The Company calculates its provision for income taxes during interim reporting periods by applying an estimate of the annual effective tax rate to its year-to-date pretax book income or loss. The effective tax rate (income taxes as a percentage of income before income taxes) was 31.9% and 29.3% for the three and six months ended June 30, 2026, respectively, compared to 41.2% and 31.6% for the three and six months ended June 30, 2025, respectively. The Company’s effective income tax rate can vary from period to period depending on, among other factors, the amount of permanent tax adjustments and discrete items. The change in the fair value of the contingent earnout shares is considered a permanent, non-taxable item for income tax purposes and was the primary driver for the fluctuations in the tax rate year over year.

The One Big Beautiful Bill Act (the “Act”) was signed into law on July 4, 2025. The Act contains significant tax law changes impacting business taxpayers with various effective dates, with certain provisions effective in 2025 and others to be implemented through 2027. Among the tax law changes that impact the Company are those that relate to the timing of certain tax deductions including depreciation expense, interest expense and research and development expenditures. Because these tax law changes impact the timing of these deductions, they will not reduce the Company’s overall effective tax rate. However, these tax law changes have resulted in a favorable reduction to our current tax expense for the six months ended June 30, 2026, which was offset by an increase to deferred tax expense.

On May 1, 2026, the Company purchased \$18.2 million of 2025 production tax credits for a total cost of \$16.9 million. The Company will use the purchased tax credits on its 2025 federal tax return to the extent allowable. Any excess credits that were not utilized on the 2025 federal tax return were carried back to tax years 2022-2024 and fully utilized.

Note 17. Commitments and Contingencies

Lawsuits and claims are filed against the Company from time to time in the ordinary course of business, including related to employee matters, employment of professionals and non-compete clauses and agreements. Other than settled matters explained as follows, these actions are in various stages, and no judgments or decisions have been rendered. Management, after reviewing matters with legal counsel, believes that the outcome of such matters will not have a material adverse effect on the Company's financial position or results of operations.

The Company has been involved in a series of related litigated matters stemming from claims that it wrongly contracted with various different licensed establishments (the "Defendant Establishments") in 2012 in violation of the contractual rights held by J&J Ventures Gaming, LLC ("J&J"), as further described below.

On August 21, 2012, one of the Company's operating subsidiaries entered into certain agreements with Jason Rowell ("Rowell"), a member of Action Gaming LLC ("Action Gaming"), which was an unlicensed terminal operator that had exclusive rights to place and operate gaming terminals within a number of establishments, including the Defendant Establishments. Under agreements with Rowell, the Company agreed to pay him for each licensed establishment which decided to enter into an exclusive location agreement with Accel. In late August and early September 2012, each of the Defendant Establishments signed a separate location agreement with the Company, purporting to grant the Company the exclusive right to operate gaming terminals in those establishments. Separately, on August 24, 2012, Action Gaming sold and assigned its rights to all its location agreements to J&J, including its exclusive rights with the Defendant Establishments (the "J&J Assigned Agreements"). At the time of the assignment of such rights to J&J, the Defendant Establishments were not yet licensed by the Illinois Gaming Board ("IGB"). As a result of subsequent litigation, the Supreme Court of Illinois determined that the IGB has exclusive jurisdiction to decide the validity and enforceability of gaming terminal use agreements, including the J&J Assigned Agreements.

Between May 2017 and September 2017, both the Company and J&J filed petitions with the IGB seeking adjudication of the rights of the parties and the validity of the J&J Assigned Agreements. Those petitions were recently adjudicated by the IGB, largely in the Company's favor, and J&J has filed two new lawsuits to challenge the IGB's rulings. J&J lost at both the trial court and appellate court level and recently filed a petition with the Illinois Supreme Court seeking permission for a further appeal. The petition for leave to appeal was denied by the Illinois Supreme Court. The second case was dismissed on May 5, 2025 and not appealed.

On March 9, 2022, the Company filed a lawsuit in the Circuit Court of Cook County, Illinois against Gold Rush relating to the Gold Rush convertible notes. The complaint sought damages for breach of contract and the implied covenant of good faith and fair dealing as well as unjust enrichment. On June 22, 2022, Gold Rush filed a lawsuit in the Circuit Court of Cook County, Illinois against the Company. The lawsuit alleged that the Company tortiously interfered with Gold Rush's business activities and engaged in misconduct with respect to the Gold Rush convertible notes. Both suits were dismissed with prejudice as a result of the previously mentioned settlement between the Company and Gold Rush on the convertible notes in May 2023. For more information, see Note 4.

On March 25, 2022, Midwest Electronics Gaming LLC ("Midwest") filed an administrative review action against the IGB, the Company and J&J in the Circuit Court of Cook County, Illinois seeking administrative review of decisions of the IGB ruling in favor of the Company and J&J and against Midwest regarding the validity of certain use agreements covering locations currently serviced by Midwest. No monetary damages are sought against the Company. The Company filed a motion to dismiss Midwest's amended complaint, which was granted in part and denied in part. The Company moved for summary judgment, and the trial court granted summary judgment in favor of the Company. The only remaining claim is Midwest's claim against the IGB for the administrative review of the IGB's decision. In July 2026, the trial court remanded the matter to the IGB to further evaluate the allegation made by Midwest and the effect, if any, on the validity of Accel's use agreement.

Accel Entertainment, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements — (Continued)

In July 2022, an enforcement action was brought against the Company by an Illinois municipality related to an alleged violation of an ordinance requiring the collection of an additional tax, the enforceability of which is currently being contested by the Illinois Gaming Machine Operators Association in the Circuit Court of Cook County. Rather than litigate the alleged violation, the Company pleaded no contest and has made the appropriate payments to the municipality during 2023, 2024 and 2025. In November 2025, a Circuit Court ruling, favorable to the Company, indefinitely stayed future administrative hearings and fines pending an appeal by the Illinois municipality. The Company does not anticipate making future voluntary payments during the appeal process.

In February 2023, an Illinois municipality issued an order against the Company for the alleged failure to pay a terminal operator tax (“TO Tax”) for the privilege of operating gaming terminals within the municipality. The TO Tax was adopted by the municipality on June 8, 2021, but there was no enforcement of this tax until the Company was issued a notice of hearing in February 2023. In April 2023, the Company, along with numerous other terminal operators, filed a complaint in the Circuit Court of Cook County, Illinois contesting the validity and enforceability of the TO Tax and won a temporary restraining order. On March 21, 2025, the Circuit Court of Cook County ruled favorably for the Company. The municipality has appealed this ruling.

Note 19. Related-Party Transactions

On July 14, 2026, the Company appointed Stan Guidroz as the Company’s Chief Operating Officer, effective immediately.

Mr. Guidroz owns Toucan Management, LLC (“Toucan Management”), which was a party to the Asset Purchase Agreement, dated April 11, 2023, as amended (the “Purchase Agreement”), in which the Company acquired 85% of the outstanding membership interests of Toucan Gaming, LLC (“Toucan Gaming”) on November 1, 2024 (the “Toucan Acquisition”). Toucan Management owns 15% of the outstanding membership interests of Toucan Gaming. Consequently, Mr. Guidroz has a continuing economic interest in Toucan Gaming, which is the Company’s Louisiana subsidiary.

Pursuant to the Purchase Agreement, the Company is also required to make annual installment payments to Toucan Management of \$500,000 on the anniversary of the closing of the Toucan Acquisition. Eight annual installment payments remain outstanding as of June 30, 2026 as one of the anniversary payments was paid at closing. The installment payments are not affected

Accel Entertainment, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements — (Continued)

by Mr. Guidroz’s employment with the Company and continue to be governed by the Purchase Agreement. The Purchase Agreement also provides that remaining unpaid installment payments may accelerate upon specified events, including certain sale transactions involving the Company or Toucan Gaming.

In addition, the Toucan Gaming Amended and Restated Limited Liability Company Agreement, dated as of November 1, 2024 (the “Toucan LLCA”), provides for certain put and call rights with respect to the 15% membership interest held by Toucan Management. The Company has a call right to purchase all such membership interests after the tenth anniversary of November 1, 2024, or earlier upon specified events, including termination of Mr. Guidroz’s employment for cause or a sale of the Company. Toucan Management and related parties have a put right to require the Company to repurchase all, but not less than all, of their membership interests after the seventh anniversary of November 1, 2024, following termination of Mr. Guidroz’s employment without cause or following certain other events described in the Toucan LLCA. The applicable purchase price for the put or call is based on the amount the Toucan Management members would receive if Total Equity Value (as defined in the Toucan LLCA) were distributed to such members.

Company Overview

We are a leading distributed gaming operator in the United States (“U.S.”), as well as a developer of brick-and-mortar casinos that serve local gaming markets and horse racing venues. We are a preferred partner for local business owners in the markets we serve. We offer turnkey, full-service gaming solutions to bars, restaurants, convenience stores, truck stops, and fraternal and veteran establishments across the country as well as casinos and horse racing venues. Our focus is providing unmatched customer support, guidance, and expertise so our location partners can grow their businesses with an additional revenue stream. We install, maintain, operate and service gaming terminals and related equipment for our location partners as well as redemption devices that have automated teller machine (“ATM”) functionality and stand-alone ATMs. We offer amusement devices, including jukeboxes, dartboards, pool tables, and other entertainment related equipment. These operations provide a complementary source of lead generation for our gaming business by offering a “one-stop” source of additional equipment for our location partners.

We also design and manufacture gaming terminals and related equipment. We are continuously evaluating additional opportunities that are complementary to our core business, such as our acquisition of Fairmount Park - Casino & Racing (“Fairmount”) in Collinsville, Illinois.

We currently operate in the following states:

Distributed Gaming Competitive Landscape

We compete in the distributed gaming landscape on the basis of the responsiveness of our service to our locations and players, and the popularity, content, features, quality, functionality and reliability of our products. In the distributed gaming industry, we generally operate in markets where our terminal revenue splits are either statutorily determined or negotiated, as follows:

<i>Statutory Splits</i>	<i>Negotiated Splits</i>
Net terminal income splits are statutorily predetermined; minimum and maximum wagers are mandated by the applicable governing bodies	Net terminal income splits are negotiated
Pricing is not considered a factor as revenue splits with our locations are mandated by law	Pricing is a driver in contract negotiations as all revenue splits are negotiated
Location and customer experience are key differentiating factors for selecting us over our competitors	Our focus on player appeal, customer service and reputation are also key factors impacting competition
Our markets with statutory splits are: Illinois, Georgia, Pennsylvania	Our markets with negotiated splits are: Montana, Nevada, Nebraska, Iowa, Louisiana

We also enter into space lease agreements, primarily in the Nevada market, where the location earns a fixed monthly rental fee in exchange for the right for us to operate at the location. For these agreements, we are the sole holder of the applicable gaming license that allows us to operate in that location. Under these agreements, we recognize all of the gaming revenue and record the fixed monthly rental fees as cost of revenue.

Macroeconomic Factors

Ongoing interest rate uncertainty, persistent inflation, economic impacts from the conflict in Iran, and increased and/or reciprocal tariffs may increase the risk of an economic recession and volatility in the capital or credit markets in the U.S. and other markets globally. Our location partners may be adversely impacted by changes in overall economic and financial conditions, and certain location partners may cease operations in the event of a recession or inability to access financing. Furthermore, our revenue is largely driven by players’ disposable incomes and level of gaming activity. Economic conditions that adversely impact players’ ability and desire to spend disposable income at our location partners may adversely affect our results of operations and cash flows. For the first half of 2026, we have not observed any material impacts to our business or outlook from the macroeconomic factors noted above.

We intend to continue to monitor macroeconomic conditions closely and may determine to take certain financial or operational actions in response to such conditions to the extent our business begins to be adversely impacted.

The One Big Beautiful Bill Act (the “Act”) was signed into law on July 4, 2025. The Act contains significant tax law changes impacting business taxpayers with various effective dates, with certain provisions effective in 2025 and others to be implemented through 2027. Among the tax law changes that impact us are those that relate to the timing of certain tax deductions including depreciation expense, interest expense and research and development expenditures. Because these tax law changes impact the timing of these deductions, they will not reduce our overall effective tax rate. However, these tax law changes have resulted in a favorable reduction to our current tax expense for the three and six months ended June 30, 2026, which was offset by an increase to deferred tax expense.

Components of Performance

Net revenues

Net gaming. Net gaming revenue represents net cash received from gaming activities, which is the difference between gaming wins and losses. Net gaming revenue includes the amounts earned by our location partners and is recognized at the time of gaming play.

Amusement. Amusement revenue represents amounts collected from amusement devices operated at various location partners and is recognized at the point the amusement device is used.

Manufacturing. Manufacturing revenue represents sales of gaming terminals and software as well as other ancillary equipment.

ATM fees and other. ATM fees and other consist of fees charged for the withdrawal of funds from our redemption devices and stand-alone ATMs and is recognized at the time of the ATM transaction. Revenues from our racing operations are also included.

Operating expenses

Cost of revenue. Cost of revenue consists of i) taxes on net gaming revenue that is payable to the appropriate jurisdiction, ii) licenses, permits and other fees required for the operation of our business, iii) location revenue share, which is governed by local governing bodies and location contracts, iv) ATM and amusement commissions payable to locations, v) ATM and amusement fees and vi) expenses from our casino and racing operations.

Cost of manufacturing goods sold. Cost of manufacturing goods sold consists of costs associated with the sale of gaming terminals and software as well as other ancillary equipment.

General and administrative. General and administrative expenses consist of operating expense and general and administrative expense. Operating expense includes compensation-related costs for service technicians, route technicians, route security, preventative maintenance personnel and marketing. Operating expense also includes vehicle fuel and maintenance, and non-capitalizable parts expenses. Operating expenses are generally proportionate to the number of locations and gaming terminals. General and administrative expense includes compensation-related costs for account managers and other corporate personnel. In addition, general and administrative expense also includes information technology, insurance, rent and professional fees.

Depreciation and amortization of property and equipment. Depreciation is computed using the straight-line method over the estimated useful lives of the individual assets. Leasehold improvements are amortized over the shorter of the useful life or the lease.

Amortization of intangible assets and route and customer acquisition costs. Route and customer acquisition costs consist of fees paid at the inception of contracts entered into with third parties and our gaming locations, which allows us to install and operate gaming terminals. The route and customer acquisition costs and route and customer acquisition costs payable are recorded at the net present value of the future payments using a discount rate equal to our incremental borrowing rate associated with our long-term debt. Route and customer acquisition costs are amortized on a straight-line basis over 18 years, which is the expected estimated life of the contract, including expected renewals.

Location contracts acquired in a business combination are recorded at fair value and then amortized as an intangible asset on a straight-line basis over the expected useful life of 15 years.

Other intangible assets acquired in a business acquisition are recorded at fair value and then amortized as an intangible asset on a straight-line basis over their estimated 7 to 20-year useful lives.

Interest expense, net

Interest expense, net consists of interest on our credit facility, amortization of financing fees, accretion of interest on route and customer acquisition costs payable, and interest (income) expense on the interest rate caplets. Interest on the current credit facility is payable monthly on unpaid balances at the variable per annum Secured Overnight Financing Rate (“SOFR”) rate plus an applicable margin, as defined under the terms of the credit facility, ranging from 1.75% to 2.50% depending on the first lien net leverage ratio.

Income tax expense

Income tax expense consists mainly of taxes payable to federal, state and local authorities. Deferred income taxes are recognized for the tax consequences of temporary differences between the financial statement carrying amounts and the tax basis of the assets and liabilities.

Results of Operations

Net revenues

Total net revenues for the three months ended June 30, 2026 were \$368.1 million, an increase of \$32.2 million, or 9.6%, compared to the prior-year period. This increase was primarily driven by higher net gaming revenue of \$33.5 million, which reflected an increase in gaming locations, terminals and revenue from our casino operations, partially offset by a decrease in manufacturing revenue of \$1.2 million, or 67.8%, due to lower equipment and software sales. Net revenues by state are presented below:

(in thousands, except %s)	Three Months Ended June 30,		Increase / (Decrease)	
	2026	2025	Change (\$)	Change (%)
Net revenues by state:

Total net revenues	<u>\$ 368,125</u>	<u>\$ 335,909</u>	<u>\$ 32,216</u>	<u>9.6 %</u>

Cost of revenue

Cost of revenue for the three months ended June 30, 2026 was \$252.6 million, an increase of \$22.9 million, or 10.0%, compared to the prior-year period, driven by higher net gaming revenue and revenue from our casino operations, as described above.

Cost of manufacturing goods sold

Cost of manufacturing goods sold for the three months ended June 30, 2026 was \$0.3 million, a decrease of \$0.6 million, or 69.8%, compared to the prior-year period due to the previously mentioned decrease in equipment and software sales.

General and administrative

General and administrative expenses for the three months ended June 30, 2026 were \$59.6 million, an increase of \$4.7 million, or 8.5%, compared to the prior-year period. The increase was primarily attributable to higher compensation-related costs, as we continue to grow our operations, as well as higher professional fees and advertising costs.

Depreciation and amortization of property and equipment

Depreciation and amortization of property and equipment for the three months ended June 30, 2026 was \$13.8 million, an increase of \$0.7 million, or 5.6%, compared to the prior-year period due to an increased number of gaming terminals.

Amortization of intangible assets and route and customer acquisition costs

Amortization of intangible assets and route and customer acquisition costs for the three months ended June 30, 2026 were \$6.8 million, an increase of \$0.5 million, or 7.9%, compared to the prior-year period was primarily due to an increase in route and customer acquisition costs.

Other expenses, net

Other expenses, net for the three months ended June 30, 2026 were \$3.0 million, a decrease of \$1.1 million, or 27.3%, compared to the prior-year period. The decrease was primarily attributable to lower fair value adjustments associated with the revaluation of contingent consideration liabilities and lower non-recurring expenses, partially offset by losses on sales of assets.

Interest expense, net

Interest expense, net for the three months ended June 30, 2026 was \$8.6 million, which was a decrease of \$0.1 million, or 1.5%, compared to the prior-year period. We experienced lower interest rates, partially offset by the absence of the prior year benefit realized on our interest rate caplets and an increase in average outstanding debt. For the three months ended June 30, 2026, the weighted average interest rate, excluding the impact of our interest rate caplets, was approximately 5.5% compared to 6.5% in the prior-year period.

Loss on change in fair value of contingent earnout shares

The change in the fair value of contingent earnout shares for the three months ended June 30, 2026 was a loss of \$5.0 million, compared to a loss of \$5.7 million the prior-year period. The change was primarily due to the change in the market value of our Class A-1 common stock, which is the primary input to the valuation of the contingent earnout shares.

Income tax expense

Income tax expense for the three months ended June 30, 2026 was \$5.9 million, an increase of \$0.8 million, or 15.4%, compared to the prior-year period. The effective tax rate for the three months ended June 30, 2026 was 31.9% compared to 41.2% in the prior-year period. Our effective income tax rate can vary from period to period depending on, among other factors, the amount of permanent tax adjustments and discrete items. The change in the fair value of the contingent earnout shares is considered a permanent, non-taxable item for tax purposes and can be the primary driver for the fluctuations in the tax rate year over year.

The following table summarizes our results of operations on a consolidated basis for the six months ended June 30, 2026 and 2025:

Net revenues

Total net revenues for the six months ended June 30, 2026 were \$719.7 million, an increase of \$59.9 million, or 9.1%, compared to the prior-year period. This increase was primarily driven by higher net gaming revenue of \$62.9 million, which reflected an increase in gaming locations, terminals and revenue from our casino operations, partially offset by a decrease in manufacturing revenue of \$3.8 million, or 67.8%, due to lower equipment and software sales. Net revenues by state are presented below:

Cost of revenue

Cost of revenue for the six months ended June 30, 2026 was \$494.2 million, an increase of \$43.0 million, or 9.5%, compared to the prior-year period, driven by higher net gaming revenue as described above.

Cost of manufacturing goods sold

Cost of manufacturing goods sold for the six months ended June 30, 2026 was \$0.9 million, a decrease of \$2.1 million, or 69.5%, compared to the prior-year period due to the previously mentioned decrease in equipment and software sales.

General and administrative

General and administrative expenses for the six months ended June 30, 2026 were \$117.6 million, an increase of \$9.7 million, or 9.0%, compared to the prior-year period. The increase was attributable to higher compensation-related costs, as we continue to grow our operations, as well as higher professional fees and advertising costs.

Depreciation and amortization of property and equipment

Depreciation and amortization of property and equipment for the six months ended June 30, 2026 was \$27.7 million, an increase of \$2.3 million, or 9.0%, compared to the prior-year period due to an increased number of gaming terminals.

Amortization of intangible assets and route and customer acquisition costs

Amortization of intangible assets and route and customer acquisition costs for the six months ended June 30, 2026 were \$13.6 million, an increase of \$1.0 million, or 7.9%, compared to the prior-year period was primarily due to an increase in route and customer acquisition costs.

Other expenses, net

Other expenses, net for the six months ended June 30, 2026 were \$6.5 million, a decrease of \$0.4 million, or 5.9%, compared to the prior-year period. The decrease was primarily attributable to lower non-recurring expenses, lower fair value adjustments associated with the revaluation of contingent consideration liabilities and lower lobbying and legal expenses related to new markets, partially offset by losses on sales of assets.

Interest expense, net

Interest expense, net for the six months ended June 30, 2026 was \$17.1 million, a decrease of \$0.3 million, or 1.8%, compared to the prior-year period. We experienced lower interest rates, partially offset by a lower benefit realized on our interest rate caplets and an increase in average outstanding debt. For the six months ended June 30, 2026, the weighted average interest rate, excluding the impact of our interest rate caplets, was approximately 5.5% compared to a rate of approximately 6.5% for the prior-year period.

Loss on change in fair value of contingent earnout shares

The change in the fair value of contingent earnout shares for the six months ended June 30, 2026 was a loss of \$3.5 million, compared to a loss of \$3.4 million in the prior-year period. The change was primarily due to the change in the market value of our Class A-1 common stock, which is the primary input to the valuation of the contingent earnout shares.

Income tax expense

Income tax expense for the six months ended June 30, 2026 was \$11.2 million, an increase of \$1.2 million, or 11.6%, compared to the prior-year period. The effective tax rate for the six months ended June 30, 2026 was 29.3% compared to 31.6% in the prior-year period. Our effective income tax rate can vary from period to period depending on, among other factors, the amount of permanent tax adjustments and discrete items. The change in the fair value of the contingent earnout shares is considered a discrete item for tax purposes and can be the primary driver for the fluctuations in the tax rate year over year.

Key Business Metrics

We use statistical data and comparative information commonly used in the gaming industry to monitor the performance of the business, none of which are prepared in accordance with U.S. GAAP, and therefore should not be viewed as indicators of operational performance. Our management uses these key business metrics for financial planning, strategic planning and employee compensation decisions. The key business metrics include:

- Number of locations;
- Number of gaming terminals; and
- Location hold-per-day

We also periodically review and revise our key business metrics to reflect changes in our business.

Number of locations

The number of locations is based on a combination of third-party portal data and data from our internal systems. We utilize this metric to continually monitor growth from existing locations, organic openings, purchased locations, and competitor conversions. Competitor conversions occur when a location chooses to change terminal operators.

The following table sets forth information with respect to our primary locations:

	As of June 30,		Increase / (Decrease)	
	2026	2025	Change	Change (%)
Illinois	2,692	2,741	(49)	(1.8)%
Montana	626	616	10	1.6 %
Nevada	548	355	193	54.4 %
Louisiana	105	98	7	7.1 %
Nebraska	298	275	23	8.4 %
Georgia	407	342	65	19.0 %
Total	4,676	4,427	249	5.6 %

Number of gaming terminals

The number of gaming terminals in operation is based on a combination of third-party portal data and data from our internal systems. We utilize this metric to continually monitor growth from existing locations, organic openings, purchased locations, and competitor conversions.

The following table sets forth information with respect to the number of gaming terminals in our primary locations:

	As of June 30,		Increase / (Decrease)	
	2026	2025	Change	Change (%)
Illinois	15,540	15,670	(130)	(0.8)%
Montana	6,714	6,508	206	3.2 %
Nevada	4,045	2,650	1,395	52.6 %
Louisiana	792	626	166	26.5 %
Nebraska	1,029	975	54	5.5 %
Georgia	1,161	959	202	21.1 %
Total	29,281	27,388	1,893	6.9 %

Location hold-per-day

Location hold-per-day is calculated by dividing net gaming revenue in the period by the average number of locations, which is then further divided by the number of operational days. We utilize this metric to compare market and location performance on a normalized basis. The percent change in location hold-per-day is the underlying metric we use to determine the change in same-store sales.

The following tables set forth information with respect to our location hold-per-day in our primary locations for the three and six months ended:

	Three Months Ended June 30,		Increase / (Decrease)	
	2026	2025	Change (\$)	Change (%)
Illinois	\$ 992	\$ 910	\$ 82	9.0 %

Georgia	175	146	29	19.9 %

Non-GAAP Financial Measure

Adjusted EBITDA is a non-GAAP financial measure, but is a key metric management uses to monitor ongoing core operations. Adjusted EBITDA excludes the effects of certain non-cash items or represent certain nonrecurring items that are unrelated to core performance. Management believes this non-GAAP financial measure enhances the understanding of our underlying drivers of profitability and trends in our business and facilitates company-to-company and period-to-period comparisons. Management also believes that this non-GAAP financial measure is used by investors, analysts and other interested parties as a measure of financial performance and to evaluate our ability to fund capital expenditures, service debt obligations and meet working capital requirements.

Adjusted EBITDA is defined as net income plus:

- Interest expense, net
- Income tax expense
- Depreciation and amortization of property and equipment
- Amortization of intangible assets and route and customer acquisition costs
- Stock-based compensation expense
- Loss on change in fair value of contingent earnout shares
- All other adjustments include:
 - Other expenses, net which consists of i) non-cash expenses including the remeasurement of contingent consideration liabilities, ii) non-recurring lobbying and legal expenses related to distributed gaming expansion in current or prospective markets, iii) other non-recurring expenses, and beginning in 2026 iv) gain or loss on sale of fixed assets, which were previously presented in general and administrative expenses. Prior periods have not been recast to reflect this change.
 - Loss from unconsolidated affiliates
 - Emerging markets which reflects the results, on an Adjusted EBITDA basis, for non-core jurisdictions where our operations are developing
 - Markets are no longer considered emerging when we have installed or acquired at least 500 gaming terminals in the jurisdiction, or when 24 months have elapsed from the date we first install or acquire gaming terminals in the jurisdiction, whichever occurs first.
 - Prior to June 2025, Pennsylvania was considered an emerging market.
 - As of June 2025, we no longer have any emerging markets.

(1) Loss on sale of fixed assets was \$2.5 million and \$3.2 million for the three and six months ended June 30, 2026, respectively, and is included in Other expenses, net. Loss on sale of fixed assets was \$0.1 million and \$0.3 million for the three and six months ended June 30, 2025, respectively, and is presented in general and administrative expenses, which is not an adjustment for EBITDA. Also includes approximately \$0.1 million for both the loss contributed from unconsolidated affiliates and emerging markets for the three and six months ended June 30, 2026, and 2025.

Adjusted EBITDA for the three months ended June 30, 2026, was \$58.9 million, an increase of \$5.7 million, or 10.8%, compared to the prior-year period. Adjusted EBITDA for the six months ended June 30, 2026, was \$112.7 million, an increase of \$10.0 million, or 9.7%, compared to the prior-year period. The increase for both periods was attributable to an increase in the number of locations and gaming terminals.

Liquidity and Capital Resources

We believe that our cash and cash equivalents, cash flows from operations and borrowing availability under the Credit Agreement (as defined below) will be sufficient to meet our capital requirements for the next twelve months and the foreseeable future thereafter. Our primary short-term cash needs are paying operating expenses and contingent earnout payments, purchases of property and equipment, servicing outstanding indebtedness, and funding our Board of Directors (“Board”) approved share repurchase program and near-term acquisitions. As of June 30, 2026, we had \$255.5 million in cash and cash equivalents.

Credit Agreement

In order to refinance our prior credit facility, we entered into a Credit Agreement, dated as of September 10, 2025 (the “Credit Agreement”), by and among us, Accel Entertainment LLC (the “Borrower”), the lenders from time to time party thereto, CIBC Bank USA, as administrative agent and collateral agent for the lenders and lead arranger, Fifth Third Bank, National Association, JPMorgan Chase Bank, N.A., U.S. Bank National Association, and Truist Securities, Inc., as joint lead arrangers, and Bank of America, N.A. as documentation agent.

The Credit Agreement establishes a:

- \$300.0 million revolving credit facility, including a letter of credit facility with a \$15.0 million sublimit and a swing line facility with a \$25.0 million sublimit, and
- \$600.0 million term loan facility.

The maturity date of the Credit Agreement is September 10, 2030.

Proceeds of the initial borrowings under the Credit Agreement were used to repay in full all outstanding indebtedness and terminate all commitments under our prior credit agreement, dated as of November 13, 2019, as amended.

As of June 30, 2026, the weighted-average interest rate on our borrowings under the Credit Agreement was approximately 5.5%.

We were in compliance with all debt covenants under the Credit Agreement as of June 30, 2026 and expect to remain in compliance for the next 12 months.

Other Financing Activities

From time to time, we may take advantage of favorable financing terms offered by vendors for purchases of property and equipment. Financed property and equipment totaled \$4.2 million and \$4.8 million as of June 30, 2026 and December 31, 2025, respectively, of which \$1.7 million is recorded in accounts payable and other accrued expenses for both periods with the remaining \$2.5 million and \$3.1 million recorded in other long-term liabilities on the condensed consolidated balance sheets as of June 30, 2026, and December 31, 2025, respectively.

Interest rate hedging instruments

We manage our exposure to interest rate risk through the use of interest rate hedging instruments, which are derivative financial instruments.

On January 12, 2022, we hedged the variability of the cash flows attributable to changes in the 1-month SOFR interest rates on the first \$300 million of the term loan under the prior credit agreement by entering into a 4-year series of 48 deferred premium caplets (“caplets”), which expired in January 2026.

On January 30, 2026, following the expiration of the caplets and to continue to hedge the variability of the cash flows attributable to the changes in the 1-month Term SOFR interest rate, we entered into an interest rate collar. The collar, which is designated as a cash flow hedge, establishes a cap interest rate of 4.00% and a floor interest rate of 2.9215%. The interest-rate collar is structured so its notional amount and timing exactly match the term loan’s outstanding balance and scheduled principal payments. The interest rate collar matures in September 2029.

We recognized an unrealized gain, net of taxes, on the change in fair value of the interest rate hedging instruments of \$2.2 million both for the three and six months ended June 30, 2026. In comparison, we recognized an unrealized loss, net of taxes, of \$0.8 million and \$2.0 million for the three and six months ended June 30, 2025, respectively.

We recognized interest income on the caplets of \$0.4 million for the six months ended June 30, 2026, as the caplets expired in January of 2026. In comparison, we recognized interest income on the caplets of \$1.8 million and \$3.6 million for the three and six months ended June 30, 2025, respectively. These amounts are reflected in interest expense, net in the condensed consolidated statements of operations and other comprehensive income.

As of June 30, 2026 there has been no realized gain or loss on the interest rate collar.

Temporary equity

In 2024, we acquired 85% of the ownership interests in both Toucan Gaming, LLC and LSM Gaming, LLC (herein referred to as “Toucan Gaming”), two Louisiana-based operators and owners of multiple licensed video poker establishments. Concurrent with the acquisition, we entered into a redemption agreement with the noncontrolling interest holder in the form of put and call options that would allow us to eventually own 100% of Toucan Gaming. The noncontrolling interest holder may exercise its put option after seven years, or if we have a change in control event. We may exercise our call option after ten years or upon termination of key employees of Toucan Gaming for cause. The redemption provisions are not currently considered probable. As these redemption features are not solely within our control, they cause the noncontrolling interests to be redeemable. As a result, we recorded the redeemable noncontrolling interest to temporary equity at its acquisition date fair value based on the proportionate share in net assets of Toucan Gaming, which is reported in the mezzanine section between total liabilities and

shareholders' equity in the condensed consolidated balance sheets. These redeemable noncontrolling interests are subsequently recorded at carrying value, which is adjusted for the noncontrolling interests' share of net income or loss. If the redemption criteria become probable, the redeemable noncontrolling interests are recorded at the greater of carrying value, which is adjusted for the noncontrolling interests' share of net income or loss, or estimated redemption value at each reporting period. If the carrying value, after the income or loss attribution, is below the estimated redemption value at each reporting period, we will remeasure the redeemable noncontrolling interests to its redemption value at which point any measurement period adjustments are recorded to equity and a corresponding adjustment to earnings per share.

Tax credit purchases

On May 1, 2026, we purchased \$18.2 million of 2025 production tax credits for a total cost of \$16.9 million. We will use the purchased tax credits on our 2025 federal tax return to the extent allowable. Any excess credits that were not utilized on the 2025 federal tax return were carried back to tax years 2022-2024 and fully utilized.

Cash Flows

The following table summarizes net cash provided by or used in operating activities, investing activities and financing activities for the periods indicated and should be read in conjunction with our condensed consolidated financial statements and the notes thereto included in this filing:

(in thousands, except %s)	Six Months Ended		Increase / (Decrease)	
	June 30,			
	2026	2025	Change (\$)	Change (%)
Net cash provided by operating activities	\$ 62,707	\$ 64,557	\$ (1,850)	(2.9)%
Net cash used in investing activities	(47,206)	(59,963)	12,757	21.3 %
Net cash used in financing activities	(56,616)	(21,269)	(35,347)	(166.2)%

Net cash provided by operating activities

For the six months ended June 30, 2026, net cash provided by operating activities was \$62.7 million, a decrease in cash provided of \$1.9 million compared to the prior-year period due primarily to unfavorable working capital adjustments largely due to an increase in income tax receivables due to the previously mentioned purchase of production tax credits, partially offset by increases in operating income attributable to higher revenues.

Net cash used in investing activities

For the six months ended June 30, 2026, net cash used in investing activities was \$47.2 million, a decrease in cash used of \$12.8 million compared to the prior-year period. The decrease in cash used was primarily attributable to less cash used for the purchase of property, plant and equipment, and the absence of cash paid for an operating license in the prior year period, partially offset by increased cash used for business acquisitions. We anticipate our capital expenditures will be approximately \$60-70 million in 2026.

Net cash used in financing activities

For the six months ended June 30, 2026, net cash used in financing activities was \$56.6 million, an increase in cash used of \$35.3 million compared to the prior-year period. The increase is primarily attributable to higher net repayments on debt.

Critical Accounting Policies and Estimates

In preparing our condensed consolidated financial statements, we applied the same critical accounting policies as described in our Annual Report on Form 10-K for the year ended December 31, 2025, that affect judgments and estimates of amounts recorded for certain assets, liabilities, revenues, and expenses.

Seasonality

Our results of operations can fluctuate due to seasonal trends and other factors. For example, the gross revenue per machine per day is typically lower in the summer when players will typically spend less time indoors at our locations, and higher in cold weather between February and April, when players will typically spend more time indoors at our locations. Our horse racing operations only operate during the months where the weather is conducive to racing, which is typically from late spring through the early fall. Holidays, vacation seasons, and sporting events may also cause our results to fluctuate.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. Market risk exposure is primarily the result of fluctuations in interest rates.

Interest rate risk

We are exposed to interest rate risk in the ordinary course of business. Borrowings under our credit facility were \$577.5 million as of June 30, 2026. If the underlying interest rates were to increase by 1.0%, or 100 basis points, the increase in interest expense on our floating rate debt could negatively impact future earnings and cash flows by approximately \$5.8 million annually, assuming the balance outstanding under the credit facility remained at \$577.5 million.

In order to protect against higher interest rates in the future on our credit facility, we hedged the variability of the cash flows attributable to the changes in the 1-month SOFR interest rate on the first \$300 million of the term loan by entering into a 4-year series of 48 caplets on January 12, 2022, which expired in January 2026. The caplets protected our exposure when the 1-month SOFR interest rate exceeded 2%.

On January 30, 2026, the Company continued to hedge the variability of the cash flows attributable to the changes in the 1-month Term SOFR interest rate by entering into an interest rate collar. The collar, which is designated as a cash flow hedge, establishes a cap interest rate of 4.00% and a floor interest rate of 2.9215%. The interest-rate collar is structured so its notional amount and timing exactly match the term loan's outstanding balance and scheduled principal payments. The interest rate collar matures in September 2029.

Cash and cash equivalents are held in cash vaults, highly liquid checking and money market accounts, gaming terminals, redemption terminals, ATMs, and amusement equipment. As a result, these amounts are not materially affected by changes in interest rates.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of our Chief Executive Officer ("CEO", serving as our Principal Executive Officer) and our Chief Financial Officer ("CFO", serving as our Principal Financial Officer), conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended ("Exchange Act")) as of the end of the period covered by this report. As a result of this evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of June 30, 2026.

Changes in Internal Control Over Financial Reporting

There were no changes during the quarter ended June 30, 2026, in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Information required by this Item is incorporated by reference to the discussion in Note 17, Commitments and Contingencies, of the condensed consolidated financial statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

ITEM 1A. RISK FACTORS

An investment in our Class A-1 common stock involves a high degree of risk. You should carefully consider the risk factors described under Part I - Item 1A. “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2025 and our condensed consolidated financial statements and related notes contained in this Quarterly Report on Form 10-Q in analyzing an investment in our Class A-1 common stock. If any such risks occur, our business, financial condition, and results of operations would likely suffer, the trading price of our Class A-1 common stock would decline, and you could lose all or part of your investment. In addition, the risk factors and uncertainties could cause our actual results to differ materially from those projected in our forward-looking statements, whether made in this report or other documents we file with the SEC, or our annual report to stockholders, future press releases, or orally, whether in presentations, responses to questions, or otherwise. Additional risks and uncertainties not currently known to us or those we currently view to be immaterial may also materially adversely affect our business, financial condition, or results of operations.

There have been no material changes in the risk factors described in Item 1A. “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2025.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Issuer Purchases of Equity Securities

On November 22, 2021, we announced that our Board had approved a share repurchase program of up to \$200 million shares of our Class A-1 common stock. On February 27, 2025, we announced that the Board approved an amendment to the share repurchase program to replenish the dollar amount that may be purchased under the program back to up to \$200 million shares of Class A-1 common stock (as amended, our “share repurchase program”). The timing and actual number of shares repurchased will depend on a variety of factors, including price, general business and market conditions, and alternative investment opportunities. Under the share repurchase program, repurchases can be made from time to time using a variety of methods, including open market purchases or privately negotiated transactions, in compliance with the rules of the SEC and other applicable legal requirements. The share repurchase program does not obligate us to acquire any particular amount of shares, and the share repurchase program may be suspended or discontinued at any time at our discretion.

All share repurchases were made under our publicly announced share repurchase program, and there are no other programs under which we repurchase shares. Repurchases under our share repurchase program, during applicable restricted trading windows that we periodically establish, are executed under the terms of a pre-set trading plan meeting the requirements of Rule 10b5-1(c) of the Exchange Act.

The following table presents a summary of share repurchases made during the second quarter of 2026:

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum approximate dollar value of shares that may yet be purchased under the program (in millions)
April 1, 2026 - April 30, 2026	224,972	\$11.63	224,972	\$148.6
May 1, 2026 - May 31, 2026	222,034	\$11.70	222,034	\$146.0
June 1, 2026 - June 30, 2026	30,592	\$11.93	30,592	\$145.6
Total	477,598	\$11.68	477,598	

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

During the fiscal quarter ended June 30, 2026, none of the Company's directors or officers (as defined in Rule 16a-1(f) of the Exchange Act) adopted, terminated or modified a Rule 10b5-1 trading arrangement or non-Rule 10b5-1 trading arrangement (as such terms are defined in Item 408 of Regulation S-K).
